-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: Paragraph [0028], line 1 Fig. 3 should be Fig. 1; Paragraph [0032] includes incorrect numbering as shown in Fig. 2; Paragraphs [0041] and [0042] – “514” should read --314--; and Paragraph [0047], line 1 – Fig. 5 should read Fig. 6.

Appropriate correction is required.

Claim Objections

Claims 5-7 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. These claims affix the seed electrode to an insertion cannula. The combination of claim 1 includes the seed electrode and an interface. The cannula cannot be part of this combination since it is only employed to insert the electrode prior to connection to the interface. It is a separate and distinct combination from that set forth in claim 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4 and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Cowland (3,722,005). The reference discloses a seed electrode 9, conducting wire 8, and an interface 1. Claim 8 merely sets forth intended use of the electrode.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boling (2002/0116042) in view of Wallace et al (2005/0137647). The basic system is disclosed in Figure 3 of Boling. The reference fails to disclose the particular electrode and wire structure. Wallace et al disclose such an electrode for brain stimulation in Figure 1 and as detailed in paragraph [0072]. Given this teaching, it would have been obvious to the skilled artisan to employ such an electrode in Boling to effect superior contact and stimulation to the brain.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose similar systems.
